STATEMENT OF QUALIFICATIONS

**Innovation
that works.**

The image is a composite of two photographs. The top photograph shows a large, white, corrugated metal tank being lowered into a construction site by a crane. The tank has some text on its side, including "CONTAINMENT SOLUTIONS" and "4 105,200 LBS WEIGHT". The bottom photograph shows two construction workers in safety vests and hard hats standing in a trench, looking up at the tank. The trench is lined with wooden shoring, and there is a large pile of dirt in the foreground.

MESSAGE FROM OUR CEO

To our current and future customers:

The JF Petroleum Group is the industry's most advanced solutions provider supporting the petroleum equipment communities' entire infrastructure needs across broad market segments including retail, commercial, municipal, government, military installation and the aviation community. The range of services we provide has evolved to petroleum equipment supply on a national level, the broadest service and construction offering in the industry today, advanced supply chain solutions, cutting edge technology and automation support, IT and network services, environmental testing, inspection and compliance services, e-commerce solutions and a state-of-the-art 24/7 customer care center that provides comprehensive site monitoring services, remote diagnostics and 24/7 technical service support.

The JF Petroleum Group is headquartered in Morrisville, NC, and currently operates a network of 42 full-service branches and 4 national distribution centers. Our field services group includes over 600 highly skilled and factory-certified service & installation technicians supported by the industry's most advanced supply chains and centralized service support groups.

Our goal is simple. We endeavor to be a trusted partner to our customers, offering them the most comprehensive and highest quality range of products and services, all at a great value.

This document was prepared to provide you with a brief description of our company and our capabilities. For those of you with whom we have enjoyed a business relationship, we thank you. For those of you considering the JF Petroleum Group for your future needs, we look forward to working with you.

Sincerely,

A handwritten signature in black ink that reads "Keith Shadrick". The script is fluid and cursive, with the first letters of each word being capitalized and prominent.

Keith Shadrick
CEO
JF Petroleum Group

THE CORPORATION

A. Corporate History

Garland Jones & Dallas Frank founded the Jones & Frank Company in 1945 and opened its first office in Norfolk, VA. At the time, the company had nine employees that specialized in fuel transport truck tanks and the installation and repair of gas station equipment.

Over the course of its 75-year history, the Jones & Frank Company grew organically and through a series of strategic acquisitions. The company expanded along the east coast and eventually into the Mid-west through the acquisition of Reliable Oil Equipment. By this time, Jones & Frank was the largest full service, construction and equipment distributor in the Petroleum Equipment Industry.

But the company's growth story did not end here...

In 2016, Jones & Frank acquired ANS Distributing, the industry's premier equipment distributor that provides distribution services, full site construction package support and aftermarket parts support on a nation-wide basis. Then, in 2019, Jones & Frank acquired ML Leonard, a regional service and construction company followed by the strategic acquisition of Petroleum Solutions Inc., the largest full line distribution, service and construction company in the state of Texas.

2020 marked a milestone in the company's history, as Jones & Frank officially announced a name change to unify the companies under one name and one brand, the JF Petroleum Group. During this same year, JF Petroleum Group acquired both Mccon Building & Petroleum Services Inc. (based in Texas) and JHS Construction & Fueling, LLC (based in Ohio). The following years, JF Petroleum Group acquired Rittiner Equipment Company, Inc. and Dykstra construction, Inc., adding turnkey retail construction capabilities in the Gulf Coast Region.

Headquartered in Morrisville, NC, JF Petroleum Group currently operates a network of 42 full-service branches and 4 national distribution centers. Our field services group includes over 600 skilled and factory certified service & installation technicians supported by the industry's most advanced supply chains and centralized service support groups.

B. Corporate Vision & Mission

Vision Statement

To enhance convenience and the quality of life of the people in the communities we serve by providing intelligent & sustainable solutions enabling a more prosperous, safe and greener future.

PROVIDE. BUILD. SERVE.

Mission Statement

To be a trusted partner, offering the most comprehensive range of products and services at the highest quality and a great value.

C. Our Core Values

We Are...

A Trusted Partner. We are a Trusted Partner to our customers and suppliers.

A Team. Teamwork is essential to success, therefore we work together to ensure our customers have the best experience.

Positive Citizens. We care about our communities and believe it is our duty to be socially and environmentally responsible.

A Higher Quality. We are committed to providing the highest degree of quality in every product, service and solution we offer.

Innovators. We are change leaders who dare to be different. We challenge the old ways of doing business and offer creative solutions powered by the best enabling technologies.

Passionate. We love what we do and push ourselves to be our best every day.

D. Equal Employment Opportunity Statement

The JF Petroleum Group and its affiliates provide equal employment opportunities (EEO) to all employees and applicants for employment without regard to race, color, religion, sex, national origin, age, disability or genetics.

E. Quality Policy

We provide services and products to our customers by adhering to the specifications provided for the application and meeting current regulatory requirements. Providing top quality goods and services is not only our desire, but our ongoing commitment to all of our customers. Our focus is on complete customer satisfaction and end user's acceptance of any equipment and systems we install or supply.

Our commitment to our customers is demonstrated by:

- Our emphasis on **SAFETY**
- Our **TEAM** approach to managing the company and the customer's project
- The **QUALITY** of equipment and services provided
- Our cost conscious approach to **CUSTOMER'S NEEDS**
- Over 160 Years of combined **EXPERIENCE**
- Our investment in **TRAINING** and **TECHNOLOGY**

F. Insurance Coverage

The JF Petroleum Group maintains the following insurance coverage:

- Commercial General Liability: \$2,000,000
(General Aggregate – Single Occurrence - \$1,000,000)
- Automobile Liability: \$1,000,000
- Worker’s Compensation: \$1,000,000
- Pollution Liability: \$1,000,000
- General Umbrella: \$9,000,000

G. Safety and Loss Control Program

Eliminating potential damage to property, materials and equipment and protecting the health, life and safety of our employees, clients and the general public is of the upmost importance and primary goal of the JF Petroleum Group. Through the implementation and utilization of a proactive, behavioral-based safety program, our goal is to eliminate potential accidents by providing interactive employee safety training, essential high-quality safety equipment and continuous safety communication programs to both identify potential dangers but also assist the employees with their ability to work safety in today’s fast moving environment.

To enhance employee involvement, we facilitate two safety committees comprising of field and executive personnel to maximize internal communication in all levels of the company and develop real-life, practical safety solutions. We share the safety best-practices across all regions of our footprint and focus on the safety challenges impacting our personnel as they complete their daily tasks.

Training, communication, active assessment and personnel interactions form the backbone of our safety initiatives and facilitate our path towards continuous improvement.

PORTFOLIO OF OFFERINGS

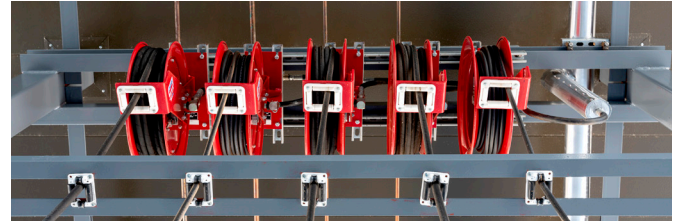

A. Retail Petroleum

The JF Petroleum Group specializes in all aspects of retail petroleum storage, control and delivery systems. We are the industry's leading experts in convenience store petroleum operations, construction (from the ground up), raise and rebuilds and equipment maintenance and repair operations. Our sales staff can help with a wide variety of products, including retail fuel dispensers, POS systems, underground petroleum storage tanks, fuel management systems, canopies, lighting, and more. Our construction teams can complete full turn-key installation at your site and our network of certified technicians can provide 24/7 service, as well as any compliance testing and calibrating services.

The advent of EMV technology means your site might require new equipment to reduce the risk of fraud — the JF Petroleum Group is your EMV upgrade expert. We can get you ready for the future of payments with a variety of solutions designed to fit your store and keep you compliant. Our team of sales professionals offers expertise and consulting to provide the best possible products in the industry, cost conscious solutions and state-of-the-art c-store trends that are best suited for your application.

JF Petroleum remains focused on providing customers with one-stop solutions. We pride ourselves on being the national leader while keeping a strong local presence. Our partners can rely on our customer-focused approach centered on adding value to our customer's businesses and operations through the products and technology solutions we provide.

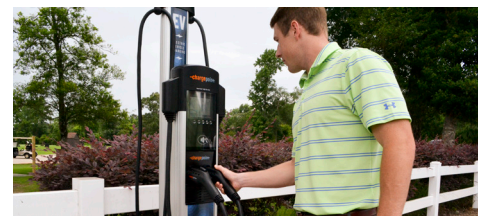

B. Commercial Fueling

Beyond the retail store, JF Petroleum Group handles a wide variety of commercial and fleet applications, and we back it up with unparalleled industry experience. Our size, strength, expertise and experience allow us to be adaptable with our service offering, handling all aspects of the job. We are staffed to handle projects of all sizes and the scale to perform multiple multi-million dollar projects simultaneously.

We're experts in fuel management systems, DEF, alternative fuels, lubrication systems, emergency power systems and many other fleet fueling specialty requirements including un-manned fueling stations. The JF Petroleum Group also offers turn-key solutions for light duty and heavy duty vehicle maintenance equipment. We have a long history of working with local and state government agencies as well as transit and municipal fleets of all sizes. We take pride in providing our commercial customer's competitive pricing and exceptional service 24 hours a day, 7 days a week and 365 days a year.

Industries We Serve:

• Municipalities • Government • Schools • Transit • Trucking Fleets • Mining • Farms • Airports • Marinas • Military • Data Centers • Bulk Storage • Vehicle Maintenance Facilities

C. EV Charging Solutions

JF Petroleum Group offers site design, sales, service and turn-key installation of Electric Vehicle (EV) Support Equipment.

Serving public and private sectors across multiple industry verticals we can provide EV Charging solutions for Retail/C-Store Fueling locations, Commercial and Private Fleets, Workplace, Multi-Family Communities, Public Parking, Municipalities and Utility providers.

Representing the Following EV Charging Products:

D. Construction

We are a market leader in the installation of underground and above ground fueling systems. Our crew leaders are A&B state licensed and have years of hands-on practical experience, adhering to all recognized practices and procedures and governmental rules & regulations. Each installer is certified for the installation of fiberglass (FRP) and fiberglass clad steel tanks, FRP underground piping systems, flexible underground piping systems, and related equipment. We will meet your needs for both new and retrofit sites. We can design your underground and aboveground facilities and manage all phases of construction and installation. Our comprehensive understanding of tank regulatory requirements is your answer to total compliance with every aspect of your job.

Services include:

- Design and layout consulting for specification and configuration of new facilities
- Permit acquisition and notifications filed with state and local authorities
- Follow all PEI RP 100 - 1400 recommended practices
- Specialized upgrade assistance including removal, repair and additions to existing equipment. Typically, our ability to coordinate various functions in-house, allows us to complete an upgrade with minimal or no site downtime.
- Design and installation of tank anchoring systems
- Monitoring system installations

Tank Removals:

As a state corrective action specialist, our crews are trained and certified on the proper removal and disposal of both above ground and underground petroleum storage tanks.

Our services include but are not limited to:

- Site inspection and evaluation of utility locations prior to removal
- Notifications filed with state and local authorities
- Strict adherence to API recommended practice 1604-Removal and Disposal of Used Underground Petroleum Storage Tanks
- State licensed UST removal and closure procedures
- Proper backfill compaction

General Contracting

Whether it's a hard bid or negotiated construction project, our team of professional estimators, project managers and superintendents will provide exemplary service to our valued customers. Specializing in convenience stores, petroleum tank installations, and commercial buildings projects.

F. Automotive Equipment Service & Repair

The JF Petroleum Group not only handles petroleum equipment, but vehicle maintenance and lubrication equipment as well. Our Automotive Division specializes in sales and service of new and used automotive shop and lube equipment. By representing a wide variety of manufacturers and providing continuous employee training by those manufactures, we are able to provide the most appropriate equipment for your shop. We are an authorized contractor of many nationally recognized professional power tool and shop equipment lines: Rotary, Forward Lift, Hunter, Graco, Alemite, Ingersoll Rand, Champion, PIUSI, and Lincoln Industrial.

The Automotive Department is capable of providing service for the following:

Automotive Lifts:

Two-Post & Four-Post
Low-Rise & Mid-Rise
Heavy Duty
ALI Certified Lift Inspections

Wheel & Alignment:

Brake Lathes
Tire Changers
Balancers
Alignment Equipment

Auto Body Equipment:

Collision Repair Equipment
Frame Machines
Measuring Systems
Regulators
Refrigerated Air Dryers
Curtain Rooms Partitions

Compressed Air Systems:

Reciprocating type
Screw type
Refrigerant dryers
System design
System evaluation
Air piping

Other Equipment:

Inventory Systems
Oil & Air Reels
Complete Quick Lube
Lubrication Equipment
Air Conditioning Equipment
Air & Hydraulic Plumbing
Oil & Grease Pumps

Warranty Repair:

Warranty service is available for most major equipment brands.

G. Equipment Service & Repair

The JF Petroleum Group is a service oriented company. All of our personnel approach their individual tasks from a customer service standpoint. Our goal is to keep your business operating. Our Service Department is equipped with the latest testing and diagnostic equipment to quickly troubleshoot and resolve equipment issues.

Our services include:

- Mechanical pumps and meters
- Electronic dispenser and console repair
- Automated system repair including: automatic tank gauging, release detection systems, Point-of-Sale systems (POS), price scanners, card readers, communication links, and other related systems.
- Tank system repair including: tanks, pumps, leak detectors, piping, hoses, nozzles and any other tank system components.
- Certified precision tank and line testing.
- Annual system compliance through tank, line and line leak detector testing required by Federal & State regulations.
- Overfill prevention, equipment testing and repair/replacement.
- Spill containment and sump testing, inspection, repair/replacement
- EMV compliant equipment install on the forecourt and in the store, including site surveys and equipment upgrades.
- Dispenser security upgrades

We are committed to be your premier service provider. Along with our repair services you will receive a dedicated service management and support team that is ready to rapidly respond to your service needs. We continuously invest in our people and infrastructure to make sure that our customers receive the highest quality for the best value available in the industry today.

Service technician vehicles are also stocked with an optimized, auto-replenished inventory and backed by local warehousing and centralized distribution network to ensure that our technicians always have access to the right part at the right time.

H. Distribution

The JF Petroleum Group is a stocking distributor. We inventory repair parts and equipment for the manufacturers we represent at all of our locations. We provide industry-leading products from over 200 suppliers, including Gilbarco, VeriFone, OPW and Franklin Fueling Systems. Our huge selection will ensure that you receive the best products for your specific needs. We know how important it is that we have the right inventory available when needed. We have a keen focus on availability and take pride knowing we offer the highest fill rates in the industry today.

Replacement Parts Program

We specialize in replacement and maintenance parts programs for convenience stores and commercial fuel system owners of all sizes, throughout the United States. These programs allow your in-house staff to make basic equipment repairs or maintenance, with parts shipped directly to you.

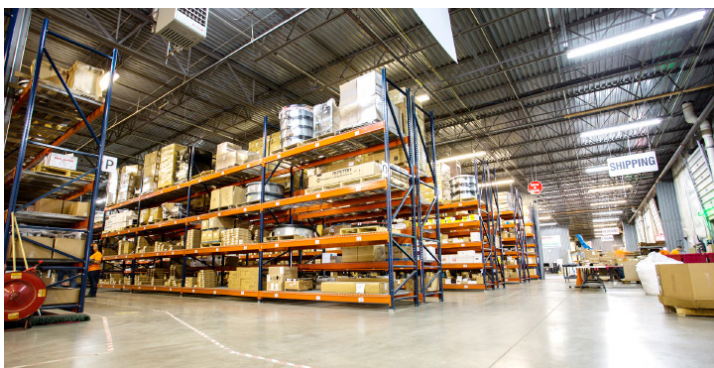

New Site Equipment Packages

We have the people, parts and expertise to provide complete full-scale equipment packages for all your fuel system and technology needs.

Same Day Shipping

We know that when you order a specific part or component, you need it promptly. That's why we offer same day shipping on all of our products.

The JF Petroleum Group fully supports the equipment we sell and service by offering spare parts with several options to keep your inventory levels fulfilled. You can purchase service parts at one of our sales counters, direct from a technician's service truck inventory, through your customer service representative or via our e-Commerce platform www.jfpetroparts.com. You can always trust that we will have what you need on the spot, or you can use one of the ordering methods above for same day or next day delivery.

I. Consulting & Project Management

The JF Petroleum Group is your one-stop solution for application and design services for the fueling systems marketplace. Our trained sales professionals have many years of experience and expertise to provide industry leading solutions and recommendations for your fueling systems. Technology has come a long way in what was historically a non-technical market. Our personnel are also trained in today's technology.

CADD & BIM Drawings

We were the first to market with CADD technology, and we continue to deliver this service where it's needed for projects and regulators. Consistency of product selection is defined at the drawing level, allowing fuel facility visuals, large roll-outs, and upgrades to be performed consistently across any enterprise.

Site Design & Pre-Construction

Our team of professionals can provide system layout and recommendations for a site design. Our preconstruction services allow us to engage during a project's early conception and enable us to provide client input on site design and consideration factors.

System Specification

If you are considering designing, installing or upgrading a fuel system, our sales professionals can provide specifications and recommendations for products regarding your application. We have the application and code expertise to support your fuel system plans.

Regional Project Management

Our team of project managers provides a single point-of-contact throughout the entire life cycle of your project. From design through pre-installation planning to post-installation close out you can be confident that your project will receive the expertise it deserves. Each project manager maintains a comprehensive knowledge of the latest local compliance requirements and can guide you through the maze of industry regulations to eliminate any surprises that may delay your project. Our project managers are experts at maintaining project schedules and coordinating resources and are skilled at proactive communications.

Professionalism is at the heart of everything we do. Our expertise, approach and customer-focused team members strive to understand your company's needs, and then exceed them through hard work and clear communication.

J. Professional Services

The JF Petroleum Group's Professional Services team is comprised of industry experts who have managed thousands of multi-branded fuel and convenience store projects across the U.S. including:

- Point-of-Sale Upgrades
- UST Additions and Fuel Remodels
- Rebrand or Reimage Programs
- Site Technology Upgrades
- EMV Rollouts
- Signage and Canopy Remodels

No matter the scope or complexity of your project, JF Petroleum Group has the experience and expertise to get it done.

Our process is agile by design. When you engage our project management services, we become an extension of you and your business. Our services are tailored to best fit your existing workflows, maximize efficiency, and optimize results.

We also offer centralized tracking and communication through our online management platform which allows you to access real-time information such as schedules, status updates, and critical documents via PC or mobile device. Solutions in the platform are customized for you, your extended team, and your project.

With a national network of contractors, JF Petroleum Group is set up to manage multi-site, multi-disciplined, and geographically dispersed programs. Let us be a single point-of-contact for even your most complex projects.

K. Environmental

As part of our turn-key solution, the JF Petroleum Group offers environmental compliance & inspection services for all aspects of retail and commercial fueling applications, ensuring our customers meet regulatory guidelines and maintain maximum up-time. Our team of experts have years of experience working with and navigating through EPA and state environmental regulations.

We work with consultants in performing environmental services for non-PRP sites as well. JF Petroleum Group will effectively communicate with environmental project managers and understands the reporting and recording requirements employed by an environmental company.

Compliance & Inspection :

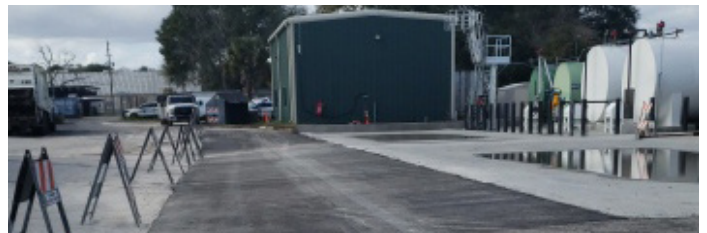

- Monthly & Annual Site Inspections
- Annual ATG Certifications
- Sump Testing
- Tank & Line Testing
- Meter Calibrations
